

REZIN MUHAMMED

SOFTWARE ENGINEER

www.linkedin.com/in/rezin-muhammed

E: rezin555@gmail.com

P: +971 524729069

A: Belhoul Apartment, Hor Al Anz, Dubai, UAE

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Material UI, Tailwind CSS, HTML, CSS
- **Backend:** Node.js, Express.js, REST APIs, Socket.io, GraphQL, Authentication & Authorization
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis
- **Cloud Services:** AWS, Azure, Google Cloud Platform (GCP)
- **Real-Time & Communication:** WebRTC, LiveKit
- **Testing:** JMeter, Artillery, Load Testing
- **Version Control:** Git, GitHub, GitLab
- **Integrations:** SMTP, Mailgun
- **Tools:** Jira

EDUCATION

MCA (2021 - 2023)

Kannur University Campus

BSc. Physics (2015 - 2018)

Wadihuda Institute of Research and Advanced Studies

PROJECT

Human-Following Luggage Trolley

- Built an autonomous luggage trolley using OpenCV-based person tracking and IoT for real-time movement and navigation.

Technologies: IoT, Python and Flask

SPACE (Supportive Platform for Autistic Children's Education)

- Developed a Flutter-based educational platform that personalized learning experiences for autistic children using IoT-enabled interactive activities.

Technologies: Flutter, Node.js, MongoDB, IoT

LANGUAGES

English
Hindi
Malayalam
Tamil

PROFESSIONAL SUMMARY

Full-Stack Engineer with experience building scalable enterprise applications using React, Node.js, TypeScript, PostgreSQL, Redis, and AWS. Skilled in designing real-time systems, optimizing application performance, and developing reusable platform architectures. Experienced in distributed systems, cloud integrations, and delivering high-impact solutions across AI-powered products.

WORK EXPERIENCE

AAISolutions, Technopark, Trivandrum - Feb 2025 to Jun 2026 (1 Year 4 Months)

FULLSTACK ENGINEER

- **Feature Development:** Developed enterprise modules including Media Library, ERP, AI-powered workflows, and a reusable Video-as-a-Service (VaaS) platform.
- **Real-Time Systems:** Architected a Socket.io and Redis-based exam streaming pipeline, replacing a legacy submission flow with scalable real-time processing.
- **Media Optimization:** Built a parallelized bulk media upload pipeline with background progress tracking and file validation for improved reliability.
- **Performance Engineering:** Introduced Artillery for WebSocket load testing, identifying and resolving performance bottlenecks in real-time services.
- **Platform Development:** Independently built a reusable LiveKit/WebRTC-based VaaS SDK with recording, messaging, screen sharing, and collaboration features.
- **System Integration:** Developed a reusable Socket.IO notification framework and led development of an AI-enabled enterprise management platform.

iLearningEngines, Trivandrum - Aug 2023 to Feb 2025 (1 Year 6 Months)

SOFTWARE DEVELOPER

- **Feature Development:** Developed and integrated 12+ features across the company's AI-powered Learning Management System (LMS).
- **Performance Optimization:** Reduced RDS CPU utilization from 99% to 65% and improved bulk upload execution time from 60+ seconds to 17 seconds through database and API optimizations, validated using JMeter load testing.
- **API Development:** Designed and implemented 50+ REST APIs supporting LMS features and cloud integrations.
- **Issue Resolution:** Debugged and resolved 60+ bugs across low, medium, and high priority levels, enhancing system stability and performance.
- **Cloud Integration:** Refactored AWS and Azure integrations and added GCP support, enabling multi-cloud deployments.
- **Application Development:** Independently built a client-requested AI-powered React application using Create React App (CRA) and Material-UI.
- **Testing & Quality Assurance:** Independently learned and implemented JMeter for load testing, ensuring optimized system performance, especially in database-heavy operations like RDS CPU usage reduction.
- **Recognition:** Received the Rising Star Award for delivering high-impact features, APIs, and performance optimizations during my first year.

SSITS, Taliparamba - Aug 2019 to Feb 2021 (1 Year 8 Months)

SYSTEM ADMINISTRATOR

- **Software Development:** Designed and developed internal web applications, including an issue-ticketing system, SMS notification platform, and CCTV management dashboard, automating key administrative workflows.
- **Infrastructure Management:** Administered servers, network infrastructure, and security systems while providing technical support and maintaining IT operations.
